PORTLAND, TUESDAY, MIRCH S, 1888. OUR INDUSTRIAL CONSILION.

Any combination to compelerant everyof lab in to pay more than they can afford to may will be of its object. No show of violence by burbles and unreasonable mon will make a suprest. The only effect of soch action is to native that to the idle, or to bide itself away. This has a been demonstrated in a signal diamon at fair a sound, where the attempt to compete analysis of labor to pay more wages that they could at

ing his land. He will be compelled to do so. Should be marke the attempt to clear I by our blocker white men at day we are his lood, after ford—and but barely afford—to pay. At produce of the soil bears extremely low no esthe land to pay more for eleating it than there can afford to pay. They will let It for in the area

Again, in the cultivation and further in ment of lands which have been exerted by the need to lands which have been exerted by the true labor large numbers of white persons now and employment; who, but for the fact that Chinese labor made it practicable to open the lands to cultivation, would not be any type! where they are, and the Households of accessive yield them support and constitute his steady the torin the business of the country would still belong to the primitive wild access.

ds of the men, and have suspended by j. pess. Here, the land owners can not meet the emands of the men, and will let the forests remain. The same thing is going to happen to the great fish panking in diagraph of the Colombia river. The Chinese, the presence say, are to be driven out of the cameries, so that the packers may be compelled to coupley writte men at bigher wages. But the produce of the disheries, like that of the soil, bears extremely how prices, and many packers during three or four years si movey, while none have made nopassing the door, who have more may be at the strong profit. In this industry, as in others, the effort to compel employers of labor to pay must than they can afford to pay will fait. Owners of packing establishments will stop operations in their business, as owners of coal indust and owners of wood lands are simplicity and will stop controlled to the slop operation in their respective lines

stop operation to their restorctive lines.

Labor in the lower forms—the kind of their performed by Chinese three most salways the cheap. Employers cannot afford to ply high lates for it. Yet on the whole the wages pad to binese here in these lower forms of their are higher than the wages paid in the Boston states to while persons in similar employ norts. One thing that has kent up the wages of white men among us, in employments above those filled by Chinese, has been the lower rules at which employers have found it possible to hire Chinese in the ruder lines of industry. Me when know in the lower forms is surremined a blow is dealt to later and wares in the more demands of the more defined. advanced forms. It is also hady cortain that advanced forms. At is according corrunt that about in the rade and want forms, butterful largely performed by (timess here, which in the event of their departure, he paid at no higher rates, though performed by white per-sons; for each labor will not bear higher wages,

and in the Rastern etates does not obtain it Manufacturing industries require skilled labor, which is always paid at higher rates than labor in the ruder forms. But there must always be a large amount of this rude and rougher labor-known usually as common labor to form a basis for support of the more advanced industries. Without the one we can not have the other. It s strange, indeed, that these facts, so trite and commonplace, should require repetition anywhere. But they who are combining together in the vain hope of compelling employers to pay more for labor, especially in its ruder forms, than they can pay without loss, have no regard for these primary facts. Hard experience alone can beach the necessary because essone. The basis of it alis business, and no sentiment. Departure of the Chinese from the Pacific slope will hasten the reduction of every ass of wages to the Eastern level. The effect will be precisely the opposite of that autic pated by those who are trying through aggressive capalinations; supported by violence upon the Chinese, to competempty res of the ruler kinds labor to pay for such labor more than they can afford to pay. No article that comes from the hand of man will bear more than a certain fixed expendition for labor emiseyet to produc-ing it. We shall now find this out here as we

meyer found it out before. Through the raile was lines the Eastern states, ancevery distant are now at our door; and the quasantly fow freights, now resulting from the railroad war, will place the products of Eastern prices. This means the Eastern lettle hope or Eastern prices. This means the Eastern lettle hope for integers or a consistency of the state of the acting a fat office which could be insin for the acting.

A prohibition name was that fit the contribution tensor was that fit the contribution name was that fit the contribution names are the fit the the Eastern basis here for labor, for interest of money, for income from property, and for profile of husbess. The pressure in this direc-tion is study and irre-titude, dimeas here have been getting higher wages than white pernave occup gening ingory wages man winto personal have been getting in the Eastern states, in the some kinds of employments. This will not continue, either for Chinas, or wilded. Capitalists here have been cots may for their smooth his her rates than those of admitted in the Flather than the continue to make the details. natules. This likewise, hears its end. All the forces of active loss resemble groupelision, quick transportation, intense rivalry of the rellwaps—bringing the cheap products of the East to our markets, are hammering as down to the Eastern level, and there is no escape from it. If our man Industrial of change in it. It is in manufactures of change during the their work on to thinese they will send to conders to easier cities, where women is we a sail changer into it our manufacturers of some cannot employ labor as clienp as the Chinese rate, the map we consume will be brought from the first, where the rate for such labor is still lower than the rate for Chinese thor here. So it is in every line of Industry. The struggery we complain of, the contraction of prices, the impossibility of getting the old wag-s for labor, is the result of Eastern competition, now exert-d upon us with more pressure than ever be are. It is not at all due to the presence of Chipese manning us, and every parents who is capable of an intelligent the comprehensive view of the subject knows:

ing the political situation in view of the near approach of the election from a local separ. In the portends much scratching of the best in Junean deepers the majery of the confecture for gaternatorial and congress onal ladinors. Uniform ans are getting their leads together in the hope of absorating side risuss and bringing things into the neual shaw for a simple party confers, but the mass of veters, with the inde-pendence that they can afferd to induige when pendence that they can afferd to induige when there is no national contest pending, take little interest as jet in the malle, beyond a determi nation to work for the supposed interests of

A recent visit r to Pana na reports that one-sixth of the const work has been done at a cost of over \$100,000,000. De Lessens now asks for \$120,000,000 more with which to dig the other five-sixths, not a word being said about the Chagres river, which is yet to be crossed. It ought not to take a man over three weeks to sake in these tacts. The whole attention is be-siming intensity absorbing upon hoth sides. The grintingst has given be larged privi-leges while here enabled him to draw over

100,000 people in France into the enernlation ICO,CCO people in France into the ensemiation. To go deeper into the enterprise, tays the correspondent, by authorizing a lottery scheme in the extreme. Upon the other hand, to call a halt is to abandon a frundred million by moday in Fanama mud, and to let loces some 100,000 creditors who will divide their wrath impartially activities the correspond to the divinorishal. between the overement and the during ished herek take arez canal.

THE PROTECTION METHOD IN PROTECTS

We are tolo that many farmers in Oregon and ford to pay has resulted in slaufting down the good these years time quality of our fruit, already exwho here laffer to thre it at a loss to then selved.

They will not do it.

The attack on Chineses who are cleared and grubbing lead in the string of Portice 18 leads of the sessimption that the to Chinese are not permitted to do the work which man will go it at their own price. These could be not getter folly. Every land owner will be compelled to do as their own price.

The attack of this could be not getter following as a land of "thig red apples," The grubbing lead in the work which man will go it should be they about 10 from the price folly. Every land owner will supply stop clearing his land. He will be compelled to do so Should be cheeped to the claim to make the price of the matter bow will be be probe to the countries of the matter bow well be not to the countries of the matter bow well be not be to be at the countries of the matter bow well be not be to be at the countries of the matter bow well be not be to be at the countries of the problem coal industry and producing general stag and in code th, will be improved greatly and its quatrof business. It is not substituted a copyril mean that is businessed. In their tasts for novelly we who here habor to hire it at a less to then select. It is not people will not go, to the length of should be theny about routing teem up to give lived to untries orchard store, to malter bow well recommended. Herintone there has been little or newsystem

Bernteters for re has been the for to system in first tree parties here. It has been the juristic of every future to make an orchard of many varieties of many fruits. Home supply has been the chief consideration, calling for variety pather than quantity. But now the conditions are changed. The best market is in the limit of the for the chief content with the latter. East, and for Eastern shipments uniform total are required. What is wanted is cardead loss of particular finits. Puring the past two years, coundission men have found it always difficult and often impossible to fill their L'estern orders. For example, if there is a call for five numbed. For example, it there is a can for give minuted loads of helifower apples, where is, the deader to find them? They are in there is the deader to find them? They are in the contry, of course, believe one man, perhaps, has morethan forth beaves. To but about over the denutry looking for small loss to make (p.n.s.) piceal. co to time and money; and then, buying in this way, there is the deadrantage of Lying business where they are, and the Housenis of necessary the probability of the country would still be too in the business of the country would still be long to the primitive wild orness.

The folly, then, of driving away from their work the Chinese who are clearing hard is not a piece with the folly that would not negatively the rough If the transaction was twenty times piece with the folly that would not negatively the rough If the transaction was twenty times kinds of work about the coal nilose at Paper sound. The name owners could not meet the following from any house the recognitive probability of the transaction was twenty times kinds of work about the coal nilose at Paper sound. The name owners could not meet the state above and there are no probability of the whole were brought in a smalle above the rough.

a single shipment from one point. !
Ad these difficulties, consequent upon the lack of system in our orchards, add to the cost of prodisting and marketing, make our profits for finding and marketing, make our profits for trak production smaller, limit and a unsat em-large business with the Eastern markets. In planting new orchards care should be taken to get trees adopted to our soil an [climate and whose fruit is of a quality that will stand transpertainer; then plant large numbers of uniform variety. An ordinadist who has a bundred trees of a kind will be able to market their product to greater advantage than if his hun ited trees are

greater trivialings that it has from these trees of a bindays or even ten different kinds.

As with apples, reats, etc., so with the small fruits. Those who have engaged in fruit cannot be take found it very difficult to get oven so reported a fruit as currants in soft ient. quality at a particular tane. Of course there are circuits enough is the painter, but no one none can supply more than a few bushels, and so, while the fruit, in small lots all over the country, liferally trads on the ground," the conner is qualify to service an adequate supply. that he was a second of the state of the sta wholeson methods.

TRASS AND DESCREASING

What was the logue paper about that it had ho age in tof the Albira citings. Only thus it dailed not contenn the holrage, and dread and approve it; benough the nonthon of it. Rot it has been accessing and commenting and erging the course that has led cirectly up to beging the contact that has left irrectly up to those a lifelight raids by masked and awardly rothers. It has made livelf the organ of this knowledge, it has made livelf the organ of this knowledge, the contage to give express approval of the results of it, feating an over whething condemnation from all decent and law-abiding people. Its course is cowardly and Lynorliked in the extreme. And yet it is distingly on the side of the masked ruthans, the provides an indulght who go in disguise to the caugh of defenseless thipses to terrorize, to robe and to drive them into the city; though all the white 'parting of "legitinate' purposes" and white 'pratting of 'legitimate 'purposes' and 'lawint methods'' its course, therefore, besides being cowardir and desploats e, is lawless, criminal-and infanuous. One thing bowers, is certain, viz. No such paper will ever have standing with the people of Orego, or gain respect and success among them. The eighths of this ku-kix system, with whom it has cast its fortunes and whose favor it sasks, are not the people of Oregon,

A Tacoma paper suys it speaks at viscily when it says that "Engene Semple has only to name the day when he will take the official oath as governor of Washington territory. The Seat-th Chrynicle is skeptical upon the point, and says: "We believe use also speak advisedly when we say that if such was the case In and Sympto would have had both bould in the air above a

A prohibition paper says that "iff the working-men of the Pacific coast would act together for annihilation of the liquor traffic; if sy would de-stroy an enomy that feddoing them a thousand fold more injury than the commetition of Chitoo more many than the compete of of on-cess falor. There is no doubt wintever that the money spent in the liquor salor as by labor-ing men exceeds by one thousand old all that they lose through Chipper competition. All keepers of ditty runs-foles, like Boraibach, know this, and it accounts for it air Interse has tility to a cines of workers who for the end the money in saloons.

Not one of the cowardly rull are who drove the Chinese from the worlds on the east side of the river on Sanday night will ever out a cord of which or take a slump out of the ground. More who to take a slump out of the ground. More who to the ground there had a at dead of night mentalized and there, not working men. No housest man puts on a mask and goes out at upon work of this kind.

"The resolution adopted by the anti-Chinese congress in this city politely requested the Chinese to go," So says the organ of auditaxism. "Polite requests" are now under sy masked rudians, in the dead of night. They are enforced with shot-gons and revolver.

The Chronicle remarks that Senat a Stanford's auxiety to see the transcontinental rates lowered has not been great enough to cause blue to put down prices between non-competitive points. A man can go from San Francisco ( ) On alta cheapet than he can go to Ogden.

There is a deadlock in the onthesal to be been In his scal to correct the work of former com-missioners, Mr., sparks is atterly neglecting the current business. It is a real hardship, or many in openous and Washington. There is such a thing as overdoing reform.

The railroad war has already fit rates between Gregori and the East 50 per cept, and chippers are making the best of the opportunity to stock up. At this season there are po east bound freights, but westbound receipts at Chicago are very large.

"Col." Hamilton would not go wi bithe "con mittee of fifteen" for daylight expeditions i Portland. He seems to have reserved himself for the midnight rulds, at the head of the kukiux, in the suburbs and outskirts.

The report of the assessment ammission, now in press, will make a volume of 150 pages. It fully decrease each clause in the proposed assement law wolch will be glose to the
